### **Earth Resources Technology Wins Multiple Award Contract to Assess Sites Impacted by Military Munitions**

Earth Resources Technology, Inc. (ERT), a SBA-certified 8(a) company, has been awarded one of six indefinite delivery/indefinite quantity small and disadvantaged business set-aside contracts to perform Military Munitions Services for the U.S. Army Corps of Engineers, Baltimore District.

Under the five year contract, ERT will provide response services to known and suspected sites that have been impacted by military munitions and/or contamination. Specifically, the primary focus will be environmental projects that are contaminated with munitions and explosives of concern.

ERT personnel assigned to remediation and removal efforts include Department of Defense trained and certified Munitions and Explosives of Concern (MEC) / Unexploded Ordnance (UXO) specialists, as well as a team of world class engineers trained in MEC response and destruction.

“ERT’s talented scientists, engineers and OE specialists are highly trained individuals and are leading experts in MEC/UXO removal and remediation,” said Peter Li, President of ERT. “We are pleased to work with the U.S. Army to ensure these sites are no longer a threat to public safety.”

The contract’s period of performance is valued at \$120 million (combined capacity of all small and disadvantaged business set-aside contracts).

Headquartered in Annapolis Junction, Md., ERT is an ISO 9001:2000 certified woman-owned company that provides science and technology support services to many federal and state agencies. ERT recently placed 127<sup>th</sup> on *Inc. Magazine*’s annual ranking of the top 500 fastest growing companies, and 9<sup>th</sup> on its top 10 list of woman-owned companies (by growth).
